PARENT COUNCIL AT HAZELWOOD

- Here at Hazelwood College we recognise the importance of developing good working relationships with parents.
- We are always looking to find effective and sustainable ways of engaging with our parents, giving them a voice and encouraging them to become involved in College life.
- The positive results of a genuine partnership between parents and the College means improved student achievement, reduced absenteeism, better behaviour, and restored confidence among parents in their children's schooling.
- Parents benefit from being able to express their views and knowing that they are able to make a difference.
- Parents can plan social activities and arrange parent information sessions.
- Parents benefit from meeting and working with others in a setting in which they feel comfortable.
- Parents also benefit from the advice and guidance the College and other parents are able to give them in supporting their children with their learning.
- The College will gain a better understanding of the views and needs of parents and how best to address them. We are better able to take advantage of the time, ideas and skills which parents have to offer.

If you are interested in joining our Parent Council, please come along to the College on Wednesday 11th November at 6:30 pm. Your support will be welcomed.
